### Profile

---

An Experienced Software Engineer with over 6 years of professional experience in creating and executing innovative software solutions, possessing a proven track record of thriving in a dynamic fast-paced environment and consistently meeting project milestones.

### Work Experience

---

#### Software Engineer, Access Holdings (Oxygen X)

July 2024 – Present

- Designed and implemented a Self-Service Onboarding module on the Oxygen Now MVP Platform using Next.js, enabling merchants to independently register, upload KYC and business documents, and receive **real-time status updates** during document review.
- Developed a Vendor Redirect workflow that enables users with incomplete onboarding to seamlessly resume their process from the exact point of interruption, improving user experience and reducing onboarding drop-offs.
- Developed a Point-of-Sale (POS) Merchant Onboarding feature with **Next.js**, empowering agents to efficiently onboard both individual and corporate clients.
- Translating Figma designs into pixel-perfect, production-ready interfaces for Oxygen Now Version 1 using **React and TypeScript**, ensuring design accuracy and optimal user experience.
- Design, develop, and maintain scalable web applications and APIs using **Node.js**.

#### Senior Fullstack Developer, Biela.dev (Remote), Dubai-UAE

Dec 2024 – Feb 2025

- Developed the Dashboard, Settings, and Profile pages from scratch based on Figma designs, ensuring seamless functionality and a consistent user experience.
- Contributed enhancements to the WebContainer platform, including the development and implementation of file management features such as creating new files and folders, renaming files or folders, and deleting files or folders, significantly improving the platform's file structure functionality and user experience.
- Developed the API documentation page, providing clear and comprehensive guidelines for users to efficiently interact with the platform's API.
- Developed a robust logic to enable seamless file uploads, enhancing user functionality and streamlining the process for managing file interactions within the platform
- Developed the Dashboard, Settings, and Profile pages from scratch based on Figma designs, ensuring seamless functionality and a consistent user experience.

#### Software Engineer (Contract), First City Monument Bank (FCMB)

July 2022 – Dec. 2024

- Wrote reusable unit tests document to ensure bug free application increasing efficiency by over 30%.
- Translate Figma designs into pixel-perfect, functional web interfaces.
- Revamped branch application's User interface (Slip free) to give the perfect look and feel of the product.
- Developed and maintained Web applications for the financial institution's online banking platform using Angular.
- Implemented secure coding practices to safeguard sensitive financial Data.
- Implemented the CBN Weekly Cash Withdrawal Limit policy on Individuals (Five hundred Thousand Naira) and Corporate Customers (Five million naira), within the stated deadline of a week.
- Built and maintained several bill payments integrations for companies these includes, Now Now, Bua Payment, Delta state college of Health Tech e.t.c which generated a revenue of over 50 percent.

- Collaborate with Product Designers and Product managers to translate financial requirements into technical specifications.
- Leveraged Angular framework to seamlessly integrate multiple APIs into Branch Software Applications, enhancing their functionality and connectivity.

#### **Fullstack Developer (Remote), Dynasty Technologies Ltd.**

Jan 2016 – Jan 2024

- Led the end-to-end development and deployment of responsive web and mobile applications, ensuring scalability, performance, and maintainability. Maintaining Codebases and Application.
- Architected and implemented product features and technical designs, collaborating with cross-functional teams to deliver secure and efficient solutions. Developing and Deployment of Websites, WebApps, and Mobile Apps
- Conducted comprehensive software testing and debugging, ensuring system stability and reducing production issues by over 25%.
- Maintained and optimized codebases, applying clean architecture principles and modern development practices to enhance code quality and performance.
- Championed CI/CD best practices and contributed to deployment automation pipelines, improving release efficiency and reducing downtime.
- Provided technical leadership and mentorship to junior developers, fostering a culture of collaboration and continuous improvement.

#### **CTO/Software Developer (Remote) Scaritel Africa, Madagascar**

Jan 2020 – July 2021

- Engineered and deployed a secure, scalable cross-border payment system using Angular and Node.js, enabling seamless multi-currency transactions and improving transaction speed and reliability.
- Led system architecture design and infrastructure optimization, ensuring high availability and performance across production environments. Conducted comprehensive software testing and debugging, ensuring system stability and reducing production issues by over 25%.
- Maintained and refactored core codebases, introducing modular design patterns and enhancing maintainability of existing services.
- Oversaw end-to-end software testing and QA processes, significantly reducing deployment errors and improving release stability. Championed CI/CD best practices and contributed to deployment automation pipelines, improving release efficiency and reducing downtime.
- Collaborated with business stakeholders to align technical initiatives with strategic goals, ensuring timely delivery of high-impact financial solutions.

#### **Frontend Engineer (Short term contract, Remote) Stakeways Ltd.**

Oct. 2020 – Feb. 2021

- Designed and developed the client-side architecture of an online betting platform using Angular 2+, delivering a fast, responsive, and user-friendly experience.
- Implemented complex UI components and ensured seamless integration and consumption with backend APIs, improving platform reliability and performance.
- Optimized frontend performance, reducing page load time and enhancing overall responsiveness across multiple devices.
- Collaborated closely with product and design teams to translate business requirements into functional, maintainable, and visually appealing user interfaces.
- Monitored and maintained system infrastructure, ensuring uptime, stability, and efficient deployment of updates.

## Technical Skills

---

- **Languages** - JavaScript, TypeScript, Java, MATLAB.
- **Software Framework / Libraries** - Reactjs, Remix, Angular, Nextjs, Node.js, Nestjs, Ionic, Express, Redux, Redux-Thunk, Redux-Saga, RxJs, NgRx store, Storybook, Springboot.
- **Database / Backend as a Service (BAAS)** – MongoDB, PostgreSQL, MySQL, Supabase, Firebase.
- **Software Testing:** Jest, Mocha, React Testing library (RTL).
- **Message Broker:** RabbitMQ.
- **DevOps:** Docker, AWS, Azure DevOps.
- **Agile Methodologies:** Kanban, Jira, Trello, Miro, Clickup.
- **Version control:** Git, GitHub, Gitlab, Bitbucket.

## Achievements

---

- **Geekle.us** (Geekle AI Hackathon 1.0) July 4. 2024 – July 31. 2024  
Won the Phase 3 AI Hackathon, [Geekle Award](#)

## Licenses and Certifications

---

- **Udacity** August 2021  
[AWS Machine Machine learning Foundations](#)
- **Kaggle** August 2021  
[Intro to Machine learning](#)
- **Kaggle** August 2021  
[Python](#)
- **NIIT Limited** September 2007  
Advanced Certificate in IT (OOAD/MMS/Java)

## Education

---

### University of Lagos, Akoka

MSc Systems Engineering

Dec 2014 – Feb 2016

### Olabisi Onabanjo University

B.Sc. Computer Science

August 2007 – Dec. 2011

### Olabisi Onabanjo University

Diploma. Data Processing

Feb 2006 – March 2007
